

Please OPPOSE HR 4026! Please DO NOT impede upon the freedom that XM satellite radio has to offer traffic and weather service. Let the power of the free market rule! I live in the metro Atlanta area and got so sick of the poor product the local FM and AM stations were providing I switched to satellite radio. I must travel often by car in my sales position and getting the weather/traffic XM offers is FAR superior to local radio. They are losing listeners due to their shoddy product, NOT unfair practices. Please don't deny me the ability to tune into a great and full-range satellite radio service.
